SUMMARY

Software Engineer with **2.5+ years** of experience building **REST APIs** and **scalable microservices** on **AWS**. Delivered high-performance backend systems, automating workflows (saving **500+ hours**) and improving application security by **40%**. Skilled in **Java, Spring Boot, and Angular**, focused on reliable, production-ready systems.

EDUCATION

Bachelor of Technology, Information Technology 2020-2024
Manipal Institute of Technology, Karnataka CGPA: 8.59

SKILLS

Languages & Frameworks	Java, C++, TypeScript, Spring Boot, Angular, HTML, CSS
Cloud & DevOps	AWS, Jenkins, Git, Datadog, Grafana
Databases & Tools	PostgreSQL, Power BI, ThoughtSpot, Figma

EXPERIENCE

Associate Software Engineer Jan 2024 - Present
Moody's Ratings *Gurugram*

- Designed and developed **REST APIs** for **automated user access** provisioning in a microservices architecture, saving **500+ hours** annually and eliminating manual workflows.
- Built **AWS Lambda**–based issuer default-status system ensuring ESMA **compliance** and scalable performance.
- Developed an AI agent using **Agentic AI** and **MCP server** to automate rating decision workflows, reducing manual effort by **70+ hours** and improving operational efficiency.
- Engineered data pipelines to process **10,000+ legacy press releases**, ensuring data accuracy via DB validation.
- Led the **Angular** version upgrade and resolved **25+ critical security vulnerabilities** (Snyk), improving application security and reducing risk exposure.

Data Analyst and Automation Intern Jun 2023 - Jul 2023
Dell Technologies *Bangalore*

- Analyzed **1M+ rows** of supply chain data using PowerBI, ThoughtSpot, PostgreSQL, and Python to drive actionable insights.
- Developed a **Power BI** simulation enabling end-users to assess specification changes, identify potential faults, and drive **real-time, data-driven decisions**.
- Built a **PostgreSQL** function for **incremental loading** of **40M+ rows** into ThoughtSpot, supporting factory-level analysis.

PROJECTS

- **Medical RAG Assistant** — Built a full-stack AI application using REST APIs, **ChromaDB**, **Groq**, and **Streamlit**, enabling low-latency medical query responses across **400+ symptoms**. GitHub
- **Urban Tails: Pet Adoption** — Developed an application using **Java, Firebase**, and Android (XML), enabling pet adoption workflows; implemented real-time data handling to improve user engagement. GitHub

LEADERSHIP

- Mentor in Moody's EmpowHER program, guiding women in STEM via tech sessions, project and lab support.
- Web Master, ACM-W Manipal — led website initiatives, technical projects, and development for club events.

ACHIEVEMENTS & CERTIFICATIONS

- **AWS Certified Cloud Practitioner** — Amazon Web Services (2025).
- **Bronze Award**, Q1 2025 (company performance recognition).
